

PPX-TEC Privacy and Security Policy for PPX-TEC mobile app

Update January 6, 2020

PPX-TEC Mobile Application is a 'bridge' created to facilitate data exchange health data between silos to include all patients in the ownership, sharing, and exchanging for engagement and decision-making. PPX-TEC app functions on a patient's smart device and the other PPX-TEC app integrated into vendor's platforms to prescribe, send, receive, search, maintain and support database fluidity. PPX-TEC does not collect, possess, have access to, or disseminate users' personal health information. PPX-TEC will not and do not use, sell or otherwise share your health data without your legal permission.

Users of the PPX-TEC app possess and have sole discretion over health data placed on their device running the PPX-TEC app. PPX-TEC uses a private relational database within the app that is protected by the mobile operating systems (iOS and Android). This data cannot be accessed outside of the app itself. Users can protect their phones via the mobile operating systems security features, which include PIN entry to access the device, and a PIN option to access the app itself.

PPX-TEC app stores PIN and prompts user for PIN to gain access. To create a PIN select a 4-digit number. PPX-TEC has 3 other layers of security required for mobile application's function. PPX-TEC Bluetooth transfer has 3 layers of security-single use 8 digit token, Bluetooth encryption and point-to-point connections that are privately made and not broadcast. An accept or decline request has to be made as consent to transfer data using PPX-TEC App between users' and others that they choose in proximity. Users' can also exchange data using PPX-TEC Share Menu by print, email, import and export. PPX-TEC email users will receive 'a pop up message' stating 'Warning you are about to send medical data in an unencrypted format to a third party. Proceed No or Yes?'

Users' data is a pass-through from vendor's platforms to user personal smart device. Beneficiary whose caretaker is using the app to store their data understands that this data may be shared with health care providers, in the same way this data would be shared with their permission without using the app.

PPX-TEC will notify all users prior to any roll out or changes. Users' will receive a 'pop up message' in app with a link on the 'About Screen' under Agreements and Certifications and the website's policy will reflect such updates. PPX-TEC will notify users of sale or merger. Acquiring company will contractually have to abide by BlueButton 2.0 policy and procedures.

PPX-TEC is integrated into Apple's Health Kit- PPX-TEC app users choose to share or not share with health kit and any data share remains under your complete control. You may choose to share your health records data with third-party apps you trust. When providing consent, you can decide which data from your health records is shared with the third-party app. The PPX-TEC iOS and Android apps are HIPAA compliant regarding users' right to privacy and security.

PPX-TEC app is a bridge to exchange data and PPX-TEC does not collect, possess, have access to, or disseminate users' personal health information.

PPX-TEC attests that our privacy policy covers all of the requirements listed in the Blue Button 2.0 API terms of service

Please refer to PPX-TEC's Terms of Service requirements.
